

Parent Survey System

The Center for Community Futures offers you a simple and effective system for surveying the parents of your Head Start program to measure perceptions of program quality.

Your Opinion Counts!					
<i>Dear Parents: The Head Start Program is committed to providing you and your family with quality services and facilities. Please take a moment to complete this survey to let us know what you think of our services. After you've completed the survey, just drop it in the mail. No postage is required. Your responses will be kept strictly confidential by an independent survey service. What you have to say is important to us. Your opinion counts; please respond today. Sincerely, Your Name, Your Title</i>

Overview of the Parent Survey System

The Parent Survey System is a concise survey system to measure Head Start parent perceptions of the quality of your program's services.

- You can choose survey questions from our prepared list, and/or you can write your own questions.
- Parents do not have to pay postage to reply; they use our business reply mail permit.
- All survey respondents are kept strictly confidential.
- Spanish translation is available upon request.
- Using an independent survey service encourages honest responses.
- You get a detailed report of the results, showing responses for each site you select and overall program findings.
- This is the most affordable system available to Head Start programs to accurately measure parent satisfaction.

We have performed this survey service since 1996. Since then, I have personally processed 22,470 surveys from Head Start parents in 17 different Head Start programs across the country. I look forward to working with your program, too! 

Subscription Costs

The cost of the Parent Survey System is a one-time only setup fee of \$295 (with no limit on the number of future surveys) plus a cost of \$1.97 per response card received. There is no charge for surveys not returned.

Typically, somewhere between 5% and 30% of the surveys you distribute will be returned. If you leave a pile on the counter, about 5% will be returned. If staff and volunteers distribute the surveys and explain the purpose and value of the survey, then the response rate will go up.

NOTE: Typically, at least 1/3 (33%) of the total number possible need to reply to have enough data for statistically valid results. We will work with you to identify the numbers needed from each location you select.
